HONEYTRACE CYBERSECURITY INCIDENT REPORT

AI-Assisted Deception Platform - Formal Evaluation Dossier

Incident ID:	INC-202611090238-127001	**Severity:**	**LOW**
Attacker IP:	127.0.0.1	**Peak Risk Score:**	35.0/100
First Seen:	2026-11-09T02:38:10.950438	**Last Seen:**	2026-11-09T02:45:12.740141
Compromise Status:	**ATTEMPT CAPTURED (Zero Host Compromise - Decoy Trapped)**		

1. Executive Narrative Summary

Adversary from 127.0.0.1 engaged HTTP with 2 distinct malicious interaction(s). Observed MITRE Tactics: [Reconnaissance]. Assessed Threat Level: LOW (Peak Risk Score: 35.0/100). Progression observed across 1 technique vector(s). (Note: All interactions isolated on deception sensors; zero host system compromise).

2. Recommended Defensive Countermeasures

1. Perimeter Defense: Enforce immediate firewall drop rule / fail2ban jail for source IP 127.0.0.1.
2. Identity & Access: Lock targeted accounts, enforce Multi-Factor Authentication (MFA), and audit active sessions.
3. Application Hardening: Enforce parameterized queries (OWASP A03) and strict path canonicalization for file APIs.
4. Non-Compromise Containment: Host assets safe. Maintain decoy honeypot monitoring to gather lateral movement telemetry.

3. Chronological Forensic Telemetry (Decoy Captures)
